

Are you ready for
BW/4HANA
migration?

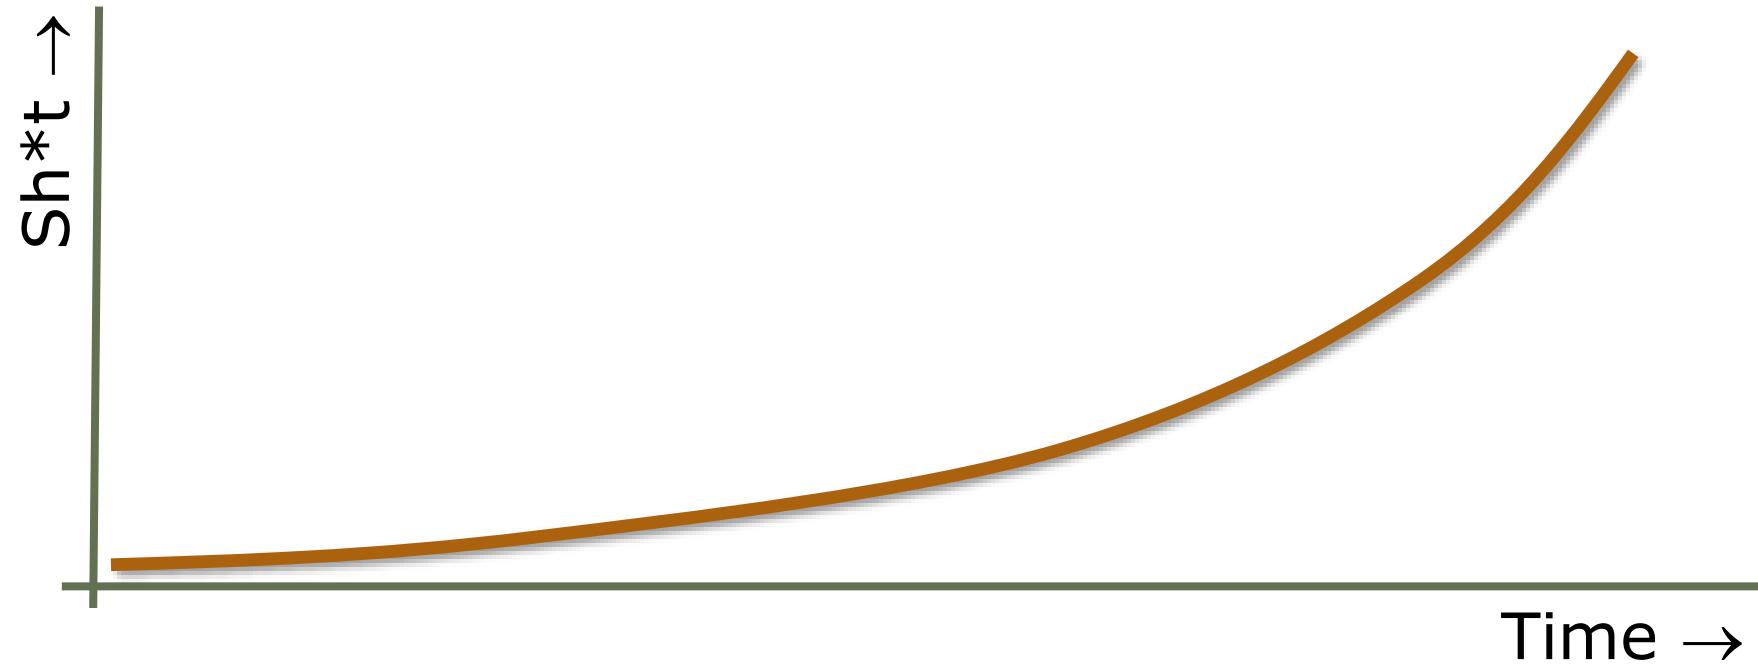

SIT NL 2019

Jan van Ansem
Foventus Ltd

janvanansem
Jan.vanansem@foventus.com
+44(0)789 059 6871

It's the E.I.S.F. !

Exponentially **I**ncreasing **S**hit **F**actor

Examples of old ~~scott~~ config

- BEx Workbooks / Web Templates
- APD's
- 3.x data sources
- ABAP FM Reporting variables
- Old ODBC / JDBC connections
- ...

I don't have all the answers....

Dec 2018: 16,000 BW implementations

SAP BW 7.5		SAP BW 7.0 to 7.4	
SAP HANA	Other Database	SAP HANA	Other Database
1,500+	2,000+	3,500+	9,000+

Where are you on your journey?

- On BW/4HANA
- On BWoH 7.5 and in good shape for BW/4HANA migration
- On BWoH but not close to ready for BW/4HANA migration
- Not 'oH' yet and a long way to go

Write on (different) post-it notes...

Post-it note 1:

- Objects / configuration you expect to find in your system and is likely to give you grief when moving to BW/4HANA

Post-it note 2:

- How long do you expect a BW/4HANA conversion project to take?
- How many people do you think you will need for the conversion?

AGENDA

- Roadmap and conversion strategy
- Get to know your systems
(and the conversion cockpit)
- Project approach

ROADMAP

- Your BI / Data Warehouse roadmap could influence the strategy for migration
 - Baseline priorities
strategic business changes, planned business initiatives, existing 'pain' and gaps
 - Address need for architectural re-design
 - Reaffirm the governance in place
 - Adapt Way of Working to become more Agile
 - Confirm UI Strategy
 - ...
- Align business with upcoming changes
(and their required involvement in the project)
- Manage business expectations

Conversion strategy

- In place
- Remote
- Shell
 - Without data
 - With data

Path 1
New to SAP or Ready for a Fresh Start

- Bring data from your old systems to a new SAP BW/4HANA system with our integrated data management and quality tools
- If the design of your current SAP landscape is over five years old, it's time to consider a fresh start
- Leverage a modern data warehouse, without modifications or work-arounds of the past

Path 2
Convert Your System

- Complete conversion of a single existing SAP Business Warehouse system to SAP BW/4HANA
- If your current SAP landscape has been highly maintained (SAP BW, powered by SAP HANA), you most likely can convert to SAP BW/4HANA in just a few steps

Path 3 *
Simplification for Faster Business Value

- Ideal for large enterprises with multiple instances of SAP and non-SAP BW systems
- Consolidation into one global SAP BW/4HANA system or selective data transfer

AGENDA

- Roadmap and conversion strategy
- Get to know your system
(and the conversion cockpit)
- Project approach

Get to know your systems

- Readiness check ('10,000ft view') ([link](#))
- Pre-checks ('the long read' - [video](#))
- Note Analyzer
Original source, target, and all SAP source systems
- Manual checks
- Conversion Cockpit checks

Ty.. Message Text

Note Analyzer results (note 2383530)

	Notes
Note Assistant	4
Corrections	16
Task Manager	7
BW4 Add-on	27
BW4 Prepare	82

- BW source, BW target, SLT, CRM, (S/4HANA)
- SP upgrade is probably easier than implementing many notes
- Note Analyzer is regularly updated! (new .xml files)

Example migration (ongoing project)

- BW 7.4 SP09 Shell conversion to BW/4HANA (Carve out)
 - HANA Sidecar migration to BW/4HANA (Carve out)
 - BI Platform 4.1 -> 4.2 migration
 - SAC implementation
-
- SAP ECC to S/4HANA migration
 - 'Codeblock' (internal org structures) change
 - Ariba and Concur implementation

Biggest issues so far

- Getting a clean system copy for development (BDLS issues galore)
- Getting Note Analyzer to work on BW 7.4 SP09
(We didn't, but upgraded to SP22 instead)
- Making source systems (CRM, SLT) ODP compliant (more notes)
- Getting all historical master data
(as the original sources may not contain this anymore)
- BW 'Self' system defined ABAP FM datasources
- Infosets (automated conversion exists, but with restrictions)
- Learning to love the Conversion Cockpit ('minimum scope')
- User Exit variables / authorisation variables
- Authorisation conversion
- Transfer routines on InfoObjects
- Missing conversion routines

Lessons learned

State of Arkansas:
Lessons from Three Parallel SAP HANA Migrations and a Conversion to
SAP BW/4HANA

Johannes Lombard, EVP: Analytics & Technology, LSI Consulting
Amber Rust, AASIS Technical Manager, State of Arkansas: DFA
Session ID # 82645

- Converting a SAP BW system to BW/4HANA is not a simple task... no 'wizard' that automatically converts everything
- The automated processes are not meant to fix badly designed models or clean up neglected systems
- Keep your SAP notes up to date! (2383530, 2603241)
- Make sure you have a mix of resources with knowledge of the old system, as well as BW/4HANA.

Training

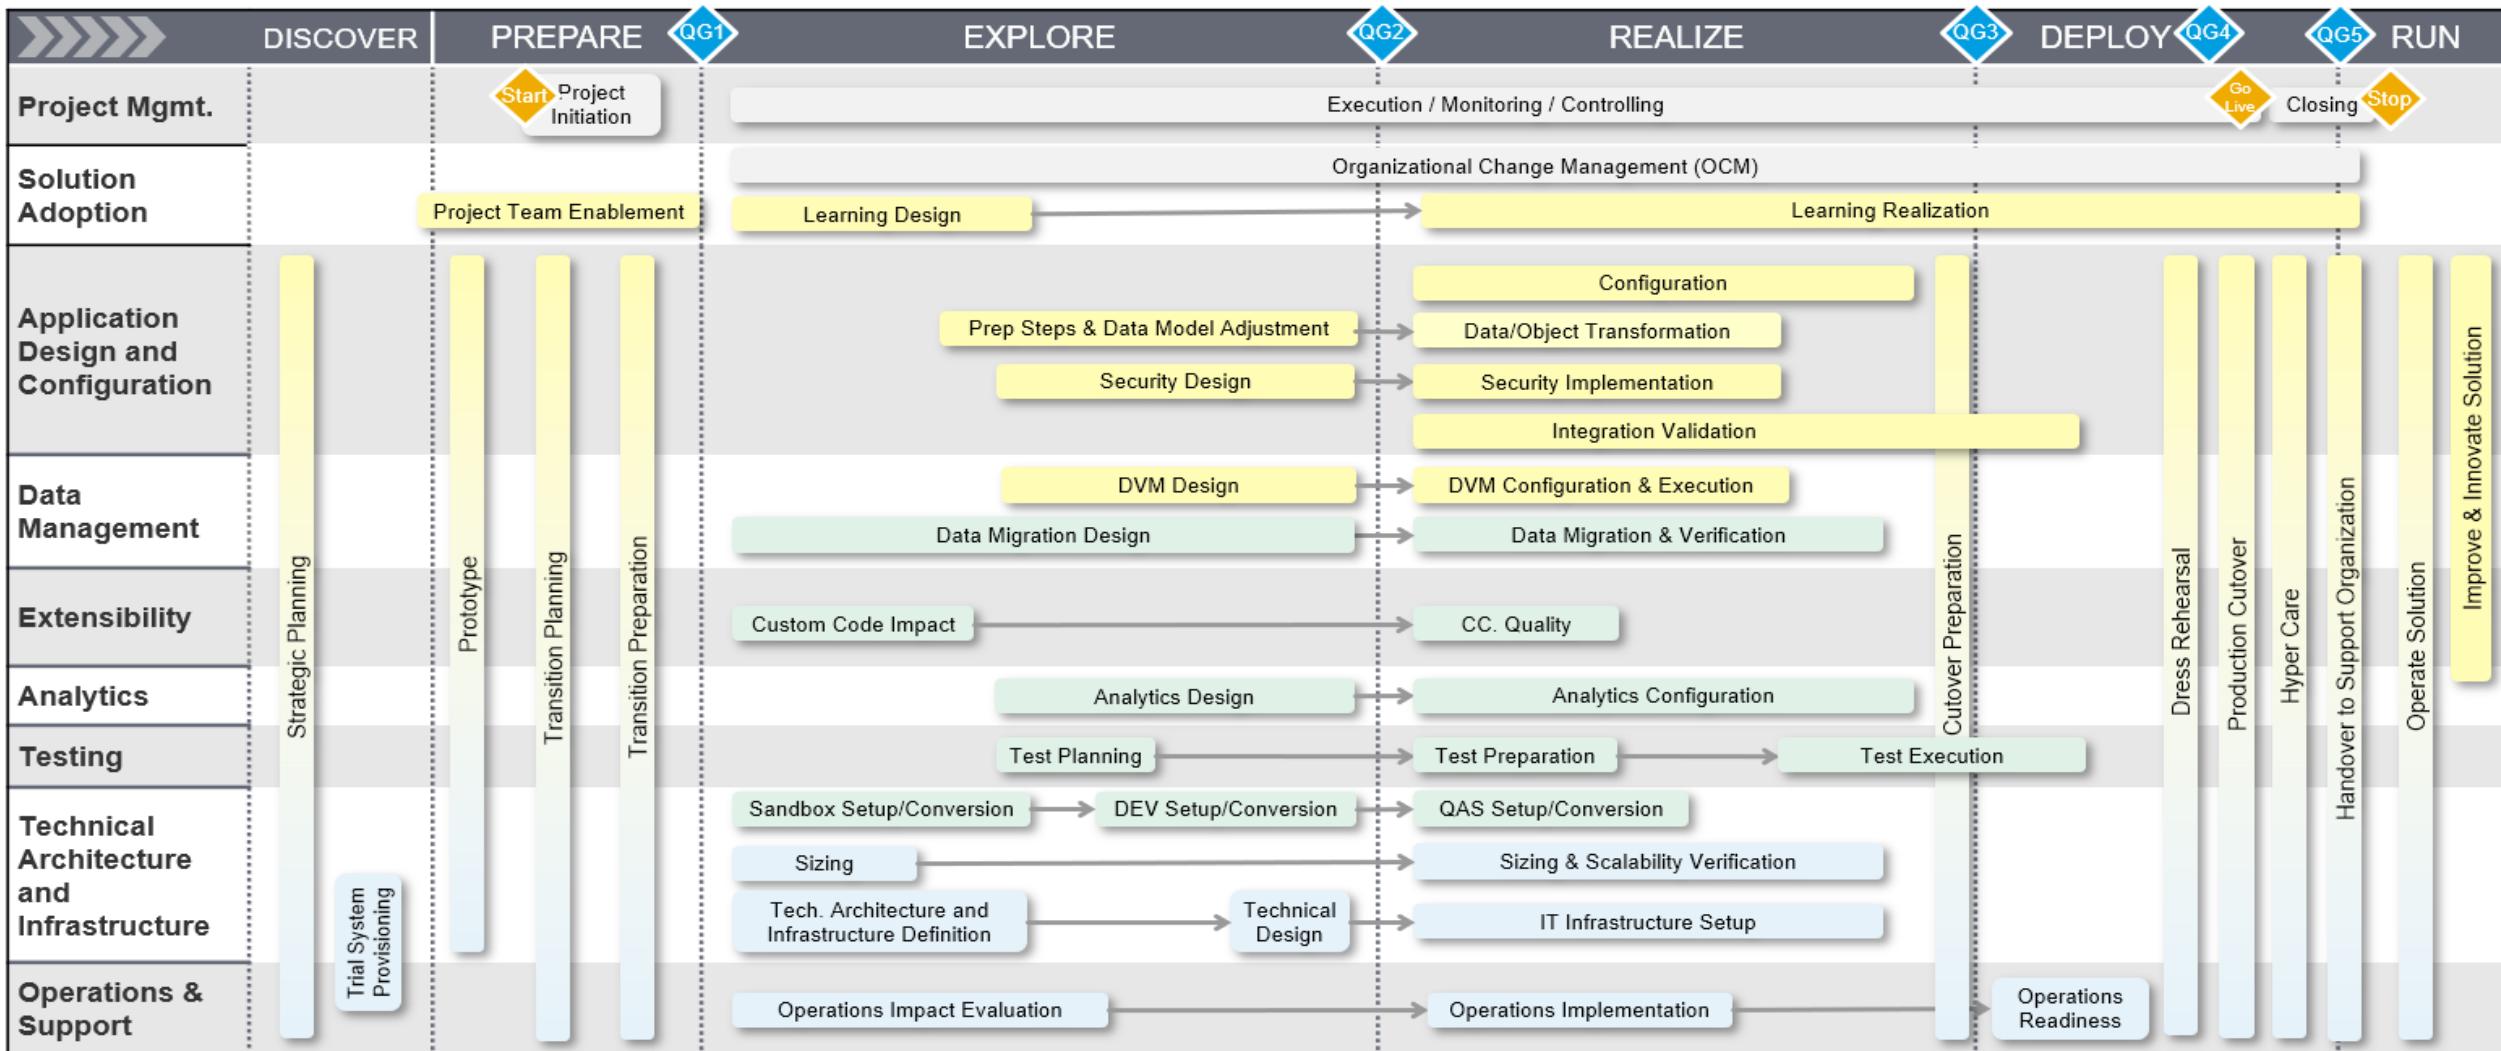

- Dedicated BW/4HANA conversion training (CBW4HANA)
- BW/4HANA training
- HANA modelling
- SDI / BODS
-

AGENDA

- Roadmap and conversion strategy
- Get to know your system
(and the conversion cockpit)
- Project approach

Use SAP Activate

Transition to SAP BW/4HANA 19Q3

SAP Activate project phases

- **DISCOVER**
 - Confirm roadmap
 - High level approach
 - Training plan
- **PREPARE**
 - HL Project plan
 - Early prep (3.x conversion)
 - Delete unsupported objects
- **EXPLORE**
 - PoC's
 - (Dev landscape setup)
 - Detailed plan
- **REALIZE**
 - Development
 - SIT / UAT / Performance test
- **DEPLOY**
 - Cutover plan
 - Go-live
- **RUN**
 - Hypercare
 - Optimise

SAP Activate resources

- **ROADMAP VIEWER (INTERACTIVE USE)**

<https://go.support.sap.com/roadmapviewer/#/group/658F507A-D6F5-4B78-9EE1-0300C5F1E40F/roadmapOverviewPage/BWHANATRANSONPRE>

- **DIRECT LINK TO PDF: TRANSITION TO BW/4HANA**

https://support.sap.com/content/dam/SAAP/SAP_Activate/S4H_366.pdf

- **BLOG WITH UPDATES**

<https://blogs.sap.com/2017/04/26/transition-roadmap-for-sap-bw4hana/>

Organise one or more sprints in every phase

- **Use the elements from the 'Agile' project methodology which are useful for you**
 - Sprints with fixed scope and duration (for example 4 weeks)
 - Define Epics / Story and use story planning sessions
 - Daily Stand-ups
 - Sprint Reviews
- **Use tools to support working in an agile way**
 - Quick 'Clubhouse' demo (but there are plenty of tools to choose from)
